01 | Future career choices

The bar chart shows the future careers preferred by 100 Grade 11 students. Write a description based on the chart. Use about 100 words.

MODEL ANSWER | 100 WORDS

The bar chart shows the future careers preferred by 100 Grade 11 students. Software and IT are the most popular choices, with 35 students. Teaching and education come next, attracting 25 students. Another 20 students prefer medicine and nursing. Engineering is less popular, with only 12 students choosing it. Graphic design is the least popular field, selected by eight students. The number choosing teaching is five higher than the number choosing medicine. Together, software and teaching account for 60 students. Overall, students show the greatest interest in software and IT, while relatively few students hope to work in graphic design.

Writing tip

Compare the largest and smallest groups. The largest group is not always a majority.

02 | Sources of daily news

The bar chart shows the main daily news sources chosen by 100 school leavers in a suburban area. Describe their choices. Use about 100 words.

MODEL ANSWER | 100 WORDS

The bar chart shows how 100 school leavers in a suburban area get their daily news. Social media is the most popular news source, chosen by 40 people. YouTube comes second, with 30 users. Television news attracts 15 school leavers, while ten prefer news websites. Newspapers are the least popular choice, with only five readers. Social media has ten more users than YouTube and eight times as many users as newspapers. Together, social media and YouTube account for 70 people. Overall, most school leavers choose these two online sources, while television news, news websites and newspapers attract much smaller groups.

Writing tip

Use the survey group in your opening sentence. Compare choices without inventing reasons.
